Punitive payout:

Princeton University's size, clout and involvement in nearly every area of American life, the number of individuals involved, and the length of time and sheer number of hostile events that took place causing long term life altering damages, deems the only way to make certain this behavior ceases, is by requiring Princeton University to pay enough money where they finally understand and stop the bad behavior. 10 million USD per year for systematic destruction of life.

The 2007-2019 - 12 years at 10 million USD per year.

- One Hundred and Twenty million USD (\$120,000,000.00 USD)
